

Six headphones that are music to the ears

These audio accessories will save you the frustration of putting up with poor sound quality of in-flight headphones

businessinsider.in

While wireless headphones offer many benefits for life on the ground, the shift away from headphone jacks can be frustrating for frequent travellers hoping to take advantage of their time in the sky with a cinematic experience. If you find yourself constantly sitting down in your seat and realising you have no way to catch up on movies or TV shows, these six headphones are necessary additions to your travel kit. Keep them in your carry-on or check-in bag solely for in-flight use and ensure that you'll never fly again without being able to tune into your personal mile-high theatre.

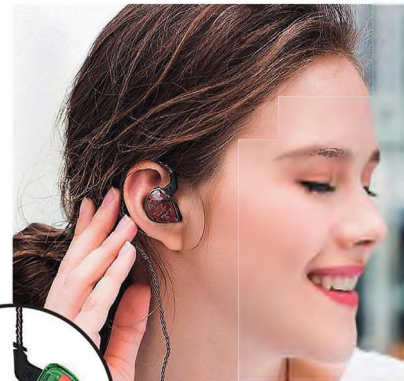

JBL Tune 110 headphones

These lightweight headphones from JBL are comfortable in your ears and have a strong level of bass. The flat cord design reduces tangling and is more than three-feet long, so you can lean back comfortably without worrying that they might rip out of the jack or worse, your ears. It also lets you control offline music with a convenient one-button remote.

Yinyoo KZ ES4 In-Ear Monitor Headphones

If you prefer headphones that drape behind and over your ear, these buds from Yinyoo are good options. Plus, they come equipped with noise-cancelling technology so you can immerse yourself in a cinematic experience in the sky.

The mid-bass and treble driver unit have a rich, vigorous performance at bass, midrange and treble.

Earpollution EPD33 Plugz Earbuds

Earpollution is another good choice if noise-cancelling is your priority during travel. They come with three different ear tips so you can choose the one that best fits your ears. It delivers deep bass, smooth, undistorted highs, and clear vocals. The single button remote/microphone is compatible with all media devices with a 3.5mm jack.

AmazonBasics Lightweight On-Ear Headphones

If you want high-quality products at a reasonable price, AmazonBasics

is always a great place to start your search. Its L-shaped stereo mini plug also connects to your phone, MP3 player, computer, or other devices with a 3.5mm jack. Plus, these are especially great because the ear cups rotate, making them easy to pack away in your travel kit. The cord is 47.3 inches long.

AmazonBasics In-Ear Headphones

You may find these in-ear headphones from AmazonBasics to be fairly basic, but they have cushy earbuds that should help avoid irritation compared to the standard in-flight options. These have a long cord like the JBL Tune 110s but are not noise cancelling. The headphones offer take-anywhere convenience and they come in a variety of popular colours to show off your personal sense of style.

Sony EX14AP Wired Earbud Headphones

For a lightweight design and good audio quality, it doesn't get better than these earbuds from Sony. While they are not noise cancelling, the 9mm neodymium drivers deliver powerful music playback and the silicone earbuds fit securely for optimal comfort. The in-ear sports headphones also include a multifunction-button that lets you control your phone without removing it from your pocket after touchdown.
